The Model 200, CW TWT Amplifier has been designed to operate 200/250 watt traveling wave tubes up to 18 GHz. Internal power supplies are solid state DC-DC converter designs with fast loop response times so that output level variations are minimal. Both cathode and collector power supplies and the heater supply are duty cycle regulated designs. The cathode and collector power supplies have very low ripple, with attendant low phase noise in the TWT Amplifier. Output spurious signals are less than -50 dBC. Plug-in PC boards are accessible through the front panel. The PC card cover contains a legend for PC card located test points and controls.

The modular design of the Model 200 provides convenient accessibility to all elements in the TWT amplifier. High voltage modules are encapsulated, plug-in assemblies. There is no exposed high voltage. Most modules are interchangeable between all units regardless of frequency.
Model 200 200/250 W CW TWTA

SPECIFICATIONS

- Duty Cycle: CW
- Spurious Outputs: -50 dBc, Maximum
- Phase Noise: Less than ±1°
- Amplitude Variation: 0.1 dB, Maximum
- Gain: 35 dB, Minimum
- Noise Figure: 35 dB, Nominal
- RF Connectors: Type N or Waveguide
- Primary Power: 3 Phase, 208 VAC ±10%, 50/60 Hz
- Operating Temperature: 0 to 50°C
- Weight: 140 lbs, Nominal
- Dimensions: 12.25x19x28.5 (in.)

Standard Equipment

- Input Isolator
- Filament / Operate Time
- IEEE-488 Remote Interface
- Reverse Power Monitor

Options

- Driver Amplifier
- Higher CW Power
- Extended Frequency Coverage
- RF Sample Ports
- RS-232/422 Remote Interface
- Other Primary Power
- Outdoor Enclosure
- RF Connectors on Front Panel
- Harmonic Filters
